Joint Interoperability Test Command (JTE)

01 Jul 09

MEMORANDUM FOR DISTRIBUTION

SUBJECT: Extension of the Special Interoperability Test Certification of the Fujitsu

FLASHWAVE 4100 Extension Shelf (ES) with Software Release 6.1

References: (a) DoD Directive 4630.5, "Interoperability and Supportability of Information Technology (IT) and National Security Systems (NSS)," 5 May 2004

(b) CJCSI 6212.01E, "Interoperability and Supportability of Information Technology and National Security Systems," 15 December 2008

(c) through (f), see Enclosure

- 1. References (a) and (b) establish the Defense Information Systems Agency (DISA), Joint Interoperability Test Command (JITC), as the responsible organization for interoperability test certification.
- 2. The Fujitsu FLASHWAVE 4100 ES with Software Release 6.1 is hereinafter referred to as the System Under Test (SUT). The SUT meets all of the critical interoperability requirements for the Defense Switched Network (DSN) and is certified for joint use. The SUT met the critical interoperability requirements for a Strategic Network Element set forth in appendices 5 and 9 of reference (c) using test procedures derived from reference (d). Although the SUT offers European Basic Multiplex Rate (E1) access interfaces, these interfaces were not tested by JITC. No other configurations, features, or functions, except those cited within this report, are certified by the JITC. This certification expires upon changes that affect interoperability, but no later than three years from the date of the original memorandum (17 March 2009).
- 3. The extension of this certification is based upon a desktop review. The original certification is based on interoperability testing conducted by JITC, DISA adjudication of open test discrepancy reports, review of the vendor's Letters of Compliance (LoC), and Defense Information Assurance (IA)/Security Accreditation Working Group (DSAWG) accreditation. Interoperability testing was conducted by JITC at the Global Information Grid Network Test Facility, Fort Huachuca, Arizona from 7 July through 1 August 2008. Regression testing was conducted from 1 through 5 December 2008 and documented in reference (e). Review of vendor's LoC was completed on 11 December 2008. DISA adjudication of outstanding test discrepancy reports was completed on 18 December 2008. DSAWG grants accreditation based on the security testing completed by DISA-led Information Assurance test teams and published in a separate report (reference (f)). DSAWG accreditation was granted on 10 March 2009. The original certification included a four-year certification for interoperability based on reference (b).

However, IA accreditation is limited to three years, and the Office of the Secretary of Defense mandated that special interoperability certifications in accordance with the UCR 2008 be limited to three years. A desktop review was requested to include additional components to the certification, and JITC determined that there was no risk to the DSN to include the additional components. The desktop review request was approved on 14 May 2009. DSAWG accreditation was granted on 16 June 2009. Table 1 includes the tested system configuration and the additional components that have been verified via JITC analysis.

Table 1. Tested Components (continued)

NOTE: Components bolded and underlined were tested by JITC. The other components in the family series were not tested; however, they utilize the same hardware and JITC analysis determined them to be functionally identical for interoperability certification purposes and they are also certified for joint use.

Table 2. SUT Interoperability Test Summary

DSN Access Interfaces					
DSN Switch Access		Critical	Status	Remarks	
T1 CAS (AMI/SF) DTMF, MFR1, DP		No ¹	Certified	Met all CRs and FRs.	
T1 CAS (B8ZS/ESF) DTMF, MFR1, DP		No¹	Certified	Met all CRs and FRs.	
T1 PRI	(ANSI T1.619a)	No¹	Certified	Met all CRs and FRs.	
T1 SS7	(ANSI T1.619a)	No¹	Certified	Met all CRs and FRs.	
E1 CAS (HDI	B3) DTMF, MFR1, DP	No ¹ (Europe only)	Not Tested	The SUT offers this interface; however it was not tested. The SUT E1 CAS interface is therefore not certified by JITC. This is not a required interface for a Strategic Network Element.	
E1 ISDN P	PRI (ITU-T Q.955.3)	No ¹ (Europe only)	Not Tested	The SUT offers this interface; however it was not tested. The SUT E1 CAS interface is therefore not certified by JITC. This is not a required interface for a Strategic Network Element.	
E1 SS7 (ANSI T1.619a)		No ¹ (Europe only)	Not Tested	The SUT offers this interface; however it was not tested. The SUT E1 CAS interface is therefore not certified by JITC. This is not a required interface for a Strategic Network Element.	
DS3		No¹	Certified	Met all CRs and FRs.	
DS3C		No¹	Certified	Met all CRs and FRs.	
10/100 Mbps Ethernet		No ¹	Certified	Met all CRs and FRs.	
Gigabit Ethernet		No ¹	Certified	Met all CRs and FRs.	
DSN Transport Interfaces					
Optical Carrier Level	Transport Level	Critical	Status	Remarks	
OC-3	VT 1.5	No ²	Certified	Met all CRs and FRs.	
00-3	STS-1	No ²	Certified	Met all CRs and FRs.	
OC-12	VT 1.5	No ²	Certified	Met all CRs and FRs.	
OC-12	STS-1	No ²	Certified	Met all CRs and FRs.	
Features And Capabilities					
Features and Capabilities		Critical	Status	Remarks	
Syn	chronization	Yes	Certified	Met all CRs and FRs.	
Netwo	rk Management	Yes	Certified	Met all CRs and FRs.	
	Security	Yes	See note 3.	See note 3.	

Table 2. SUT Interoperability Test Summary (continued)

NOTES:

- The UCR does not stipulate a minimum Access interface requirement for a Strategic Network Element.
- 2 The UCR does not stipulate a minimum Transport interface requirement for a Strategic Network Element.
- Security is tested by DISA-led Information Assurance test teams and published in a separate report.

Security	Yes	• DIACAP and STIGs (R)	• UCI	R para. A9.6	

NOTES:
1 The
2 The The UCR does not stipulate a minimum Access interface requirement for a Strategic Network Element.

The UCR does not stipulate a minimum Transport interface requirement for a Strategic Network Element.

Table 3. SUT Capability and Feature Interoperability Requirements (continued)

LEGEND:			
A	Appendix	ISDN	Integrated Services Digital Network
ADIMSS	Advanced DSN Integrated Management Support	ITU-T	International Telecommunication Union -
	System		Telecommunication Standardization Sector
AIS	Alarm Indication Signal	LSSGR	Local Access and Transport Area (LATA) Switching
ANSI	American National Standards Institute		Systems Generic Requirements
BERT	Bit Error Rate Test	Mbps	Megabits per second
C	Conditional	MLPP	Multi-Level Precedence and Preemption
CAS	Channel Associated Signaling	MOS	Mean Opinion Score
DIACAP	DoD Information Assurance Certification and	OC-3	Optical Carrier Level 3 (155 Mbps)
	Accreditation Process	OC-12	Optical Carrier Level 12 (622 Mbps)
DoD	Department of Defense	para	paragraph
DS0	Digital Signal Level 0	PRI	Primary Rate Interface
DS1	Digital Signal Level 1	Q.955.3	ISDN Signaling standard for E1 MLPP
DS3	Digital Signal Level 3	R	Required
DS3C	Digital Signal Level 3 - Concantenated	RAI	Remote Alarm Indication
DSN	Defense Switched Network	SONET	Synchronous Optical Network
DSS1	Digital Subscriber Signaling 1	SS7	Signaling System 7
DWDM	Dense Wavelength Division Multiplexing	STIGs	Secure Technical Implementation Guides
E1	European Basic Multiplex Rate (2.048 Mbps)	SUT	System Under Test
GR	Generic Requirement	T1	Digital Transmission Link Level 1 (1.544 Mbps)
	SONET Transport Systems: Common Generic Criteria	T1.105-2001	SONET – Basic Description include Multiplexer
GR-303-CORE	Integrated Digital Loop Carrier System Generic		structure, rates, formats
	Requirements, Objectives, and Interface	T1.607	ISDN – Layer 3 Signaling Specification for Circuit
GR-436-CORE	Digital Network Synchronization Plan		Switched Bearer Service for DSS1
GR-518-CORE	LSSGR: Synchronization, Section 18	T1.619a	SS7 and ISDN MLPP Signaling Standard for T1
GR-782-CORE	SONET Digital Switch Trunk Interface Criteria	UCR	Unified Capabilities Requirements
IP	Internet Protocol	VT1.5	Virtual Tributary 1.5

- 5. No detailed test report was developed in accordance with the Program Manager's request. JITC distributes interoperability information via the JITC Electronic Report Distribution (ERD) system, which uses Unclassified-But-Sensitive Internet Protocol Router Network (NIPRNet) email. More comprehensive interoperability status information is available via the JITC System Tracking Program (STP). The STP is accessible by .mil/gov users on the NIPRNet at https://stp.fhu.disa.mil. Test reports, lessons learned, and related testing documents and references are on the JITC Joint Interoperability Tool (JIT) at http://jit.fhu.disa.mil (NIPRNet), or http://j199.208.204.125 (SIPRNet). Information related to DSN testing is on the Telecom Switched Services Interoperability (TSSI) website at http://jitc.fhu.disa.mil/tssi.
- 6. The JITC point of contact is Mr. Joseph Roby, DSN 879-0507, commercial (520) 538-0507, FAX DSN 879-4347, or e-mail joseph.roby@disa.mil. The JITC's mailing address is P.O. Box 12798, Fort Huachuca, AZ 85670-2798. The tracking number for the SUT is 0820403.

FOR THE COMMANDER:

Enclosure a/s for RICHARD A. MEADOR

Chief

Battlespace Communications Portfolio

Q. T. Schutt

Distribution (electronic mail):

Joint Staff J-6

Joint Interoperability Test Command, Liaison, TE3/JT1

Office of Chief of Naval Operations, CNO N6F2

Headquarters U.S. Air Force, Office of Warfighting Integration & CIO, AF/XCIN (A6N)

Department of the Army, Office of the Secretary of the Army, DA-OSA CIO/G-6 ASA (ALT), SAIS-IOQ

U.S. Marine Corps MARCORSYSCOM, SIAT, MJI Division I

DOT&E, Net-Centric Systems and Naval Warfare

U.S. Coast Guard, CG-64

Defense Intelligence Agency

National Security Agency, DT

Defense Information Systems Agency, TEMC

Office of Assistant Secretary of Defense (NII)/DOD CIO

U.S. Joint Forces Command, Net-Centric Integration, Communication, and Capabilities Division, J68
